Re: Tish Prouse

Dear Ward 6 Constituents,

I first met Tish while he was working with a sister division within our equipment group in early 2014. He made such a good impression that I followed his career, and in early 2016 I capitalized on an opportunity to bring him on to my team. Tish has a natural ability and drive to reach out to our customers, getting to the underlying problems and create solutions resulting in great customer experience. Tish approaches all of the day to day challenges with integrity and listens through all to understand the whole picture, then applies genuine desire to make things better for the people involved.

Tish applies skills acquired through an education that has taken him to many places worldwide, and has enhanced his abilities to communicate with people from a vast array cultures. Community and the desire to better our surroundings is what has lead Tish to run for Council

For those that are looking for representation on City Council that will stay true to his platform, and understands the challenges in this city that regular people, like ourselves face every day, Tish will prove worthy of expectations.
